

**Lead Regulatory Affairs Manager Plant Protection and Biocontrol (m/f/d) (part- or full-time/40 h) in WEINHEIM or REMOTE**

**About Vali Consulting GmbH**

We are a team of experienced regulatory experts who can draw on many years of successful regulatory and scientific support in the authorisation of innovative biological and conventional plant protection products and biocides.

Our clients are internationally distributed, comprise small to multi-national companies. Our team is located over Europe with partners in other parts of the world. We make use of state-of-the-art communication techniques to facilitate a close cooperation with our clients and partners.

Vali was founded in 2018 as a 100% subsidiary of ibacon GmbH, a scientific research company passionate since 1994 in providing the plant protection industry with GLP-compliant studies in the environmental risk assessment context. Over all these years the company gained substantial confidence as a reliable partner supporting industry on the way to the market authorization of their products.

We founded Vali to go a step further and to allocate regulatory services in a new environment stimulating a creative and dedicated development. Vali gives to our customers the desk support they ask us for to master increasingly complex and laborious regulatory requirements.

**To complement our regulatory scientific team, we are offering a position as**

**Lead Regulatory Affairs Manager Plant Protection and Biocontrol (m/f/d) (part- or full-time/40 h) in WEINHEIM or REMOTE**

**Your main tasks and responsibilities:**

- Coordination and target-oriented strategic management focusing on plant protection/biocontrol
- Maintenance and expansion of the existing customer base for all business areas
- Personnel management of project managers/scientific experts
- To provide senior regulatory and strategic advice for the evaluation and registration of plant protection and biocontrol products
- Negotiation of contracts and prices
- Participation in trade fairs and other customer events
- Regular communication with clients, contract research organisations and authorities
- Active participation in business development

### Your profile and qualifications:

- A university degree in chemistry, biology, agricultural science or a related discipline
- At least 5-10 years of professional experience in regulatory affairs preferably in plant protection and/or biocontrol
- Experience in personnel management
- Experience in business development would be an asset
- High level of self-motivation and good time management skills
- Excellent written and verbal communication skills in English, further language skills in a second European language would be an asset
- Profound skills in standard MS Office applications

### Our offer:

- Friendly working environment, with career opportunities in a growing company
- Flexible working hours and part time models
- Attractive salary with additional performance-based bonuses
- Support towards your private pension plan
- Coffee, tea and water are offered for free
- The working location will preferably be Weinheim (Bergstr.), Germany, with home office as an option

We are looking forward to your application together with your CV and career description, including your preferred working model, salary expectation and earliest possible date of availability to enter in your new job.
