

## **Scientific Expert in Toxicology and Regulatory Affairs Manager for Biocides (m/f/d)**

**(part- or full-time/40 h)**

### **About Vali Consulting GmbH**

We are a team of experienced regulatory experts who can draw on many years of successful regulatory and scientific support in the authorisation of innovative biological and conventional plant protection products and biocides.

Our clients are internationally distributed, comprise small to multi-national companies. Our team is located over Europe with partners in other parts of the world. We make use of state-of-the-art communication techniques to facilitate a close cooperation with our clients and partners.

Vali Consulting GmbH was founded in 2018 as a 100% subsidiary of ibacon GmbH, a scientific research company passionate since 1994 in providing the chemical industries with GLP-compliant studies in the environmental risk assessment context. Over all these years the company gained substantial confidence as a reliable partner supporting industry on the way to the market authorization of their products.

Vali Consulting GmbH has been established going a step further and allocating regulatory services in a new environment stimulating a creative and dedicated development. Vali Consulting GmbH gives to our customers the desk support they ask us for to master increasingly complex and laborious regulatory requirements.

To complement our regulatory scientific team, we are seeking a highly motivated and experienced Scientific Expert in Toxicology with a focus on regulatory affairs for plant protection products and biocides.

## **Scientific Expert in Toxicology and Regulatory Affairs Manager for Biocides (m/f/d)**

**(part- or full-time/40 h)**

### **Your main tasks and responsibilities:**

- Scientific evaluation of human toxicology data for biocides and biological and conventional plant protection products
- Preparation of the human health section of registration dossiers, including follow-up during dossier evaluation and defence
- Support in the assessment of toxicological data packages; experience with biological plant protection products would be an asset
- Identification of data gaps and development of proposals for additional studies or trials
- Conducting human health risk assessments for biocides and plant protection products
- Development of testing strategies and monitoring of ongoing studies

- Coordination and management of registration projects in accordance with the Biocidal Products Regulation (EU) No 528/2012 and/or relevant national guidance
- Regular communication with clients, contract research organisations (CROs), and regulatory authorities
- Collaboration within an interdisciplinary team of scientific experts, working closely with a lead project manager

#### **Your profile and qualifications:**

- A university degree in (bio-)chemistry, biotechnology, agricultural science, biology or a related discipline
- At least 3 years of professional experience in toxicological evaluation within a regulatory context
- Sound knowledge of the EU regulatory framework for biocides and plant protection products
- Experience in endocrine disruption assessments in toxicology would be an asset
- High level of self-motivation, reliability, and strong time management skills
- Ability to work independently within your area of expertise while contributing effectively to an interdisciplinary team
- Excellent written and verbal communication skills in English; German language skills would be an advantage
- Proficiency in standard MS Office application

#### **Our offer:**

- Friendly working environment, with career opportunities in a growing team
- Flexible working hours and part time models
- Attractive salary added by performance-based bonuses
- Support of your private pension plan

We look forward to receiving your application, including your CV and career description, as well as your earliest possible starting date.
